

BATUHAN EGE ŞAHİN

BUSINESS ANALYST | PRODUCT OWNER | AI & DIGITAL SOLUTIONS

Istanbul, Türkiye | +90 545 307 1996 | batuhanegesahin@gmail.com | linkedin.com/in/batuhanegesahin | batuhanegesahin.me

Business Analysis, Product Management and AI Solutions professional with 5+ years of cross-functional experience across fintech, banking technologies, payment systems, fraud detection, AML, B2B SaaS, aviation technologies, enterprise software and digital transformation.

Experienced in analyzing business requirements, translating stakeholder needs into functional specifications, supporting product development lifecycles and coordinating technical and business teams throughout discovery, implementation, testing and post-launch improvement processes.

Strong background in requirements gathering, business process analysis, user stories, acceptance criteria, backlog prioritization, SQL-based business logic, Agile methodologies, product discovery, stakeholder management and software delivery coordination.

Hands-on experience working with AI-powered fraud detection platforms, evaluating AI model behavior, testing intelligent product modules and contributing to LLM-based application projects. Combines technical understanding with business-oriented problem-solving and a strong focus on delivering practical, scalable digital solutions.

Demonstrated achievements include a 40% improvement in customer retention, 20% reduction in churn, 75% customer base growth within six months and significant improvements in operational efficiency.

Professional focus on Business Analysis, Product Ownership, AI Solutions, Project Management and Digital Transformation.

CORE COMPETENCIES

Business Analysis & Requirements Engineering

Business Requirements Analysis | Requirements Gathering | Functional Specifications | User Stories | Acceptance Criteria | Business Process Mapping | Gap Analysis | Stakeholder Analysis | Process Optimization | Business Logic Definition | Data Analysis | MVP Scoping | Requirements Documentation

Product Management & Product Ownership

Product Discovery | Product Requirements | Backlog Prioritization | Product Roadmap Support | Feature Definition | Product Lifecycle Management | Agile Product Delivery | Product Testing | Product Demonstrations | Customer Feedback Analysis | Product Adoption | Product Improvement

Project Management & Agile Delivery

Agile & Scrum | Sprint Planning Support | Project Coordination | Cross-Functional Team Collaboration | Scope Alignment | Stakeholder Communication | Risk & Issue Identification | Task Prioritization | Project Documentation | Implementation Coordination | Delivery Monitoring | Continuous Improvement

Artificial Intelligence & Digital Solutions

AI Model Testing | AI Model Validation | Machine Learning Applications | LLM-Based Applications | AI-Assisted Software Development | AI Product Requirements | Intelligent Fraud Detection | AI Solution Testing | Model Behavior Evaluation | Edge Case Identification | AI-Enabled Business Solutions

Fintech & Enterprise Technologies

Fraud Detection & Prevention | Anti-Money Laundering (AML) | Know Your Customer (KYC) | Transaction Monitoring | Payment Systems | Digital Wallets | Financial Crime Prevention | Risk Management | Banking Technologies | Enterprise SaaS | Warehouse Management Systems

Technical Skills & Tools

SQL | MySQL | Microsoft SQL Server | JavaScript | Node.js | React | HTML | CSS | Postman | Kibana | Jira | Confluence | Figma | Microsoft Visio | Advanced Excel | Salesforce | HubSpot | Zendesk | Playwright | GitHub Actions

PROFESSIONAL EXPERIENCE

Product & Business Analyst **February 2025 - October 2026**

Formica AI | Istanbul, Türkiye

AI-Powered Fraud Detection, AML, KYC, Fintech & Enterprise SaaS

- Managed business requirements and product coordination activities for enterprise clients, including banks, fintech companies, payment institutions and digital wallet providers.
- Conducted requirements gathering and business needs analysis to identify functional improvements for fraud detection, AML, KYC and transaction monitoring solutions.
- Translated customer feedback, business scenarios and operational requirements into structured product requirements, business rules and acceptance criteria.
- Collaborated with product managers, software developers and engineering teams to support feature development, technical feasibility assessments and product improvements.
- Contributed to product discovery and prioritization processes by identifying customer needs, operational dependencies and implementation requirements.
- Developed customer-specific SQL-based fraud detection and compliance rules, translating business scenarios into executable detection logic.
- Supported product backlog discussions, requirement clarification and coordination of development activities.
- Participated in system integration testing, post-implementation issue analysis and technical troubleshooting.
- Investigated production incidents involving transaction data flows, detection rules and system behavior, coordinating technical resolutions with engineering teams.
- Evaluated new customer requirements, identified implementation risks and supported scope clarification.
- Participated in AI model testing and validation activities for new AI-enabled platform modules.
- Analyzed model behavior, identified edge cases and communicated findings to technical teams to support AI solution quality.
- Collaborated with engineering teams on intelligent fraud detection workflows and AI-powered product capabilities.
- Delivered product demonstrations, technical onboarding and user training sessions to 20+ organizations.
- Acted as a primary communication bridge between enterprise clients, product teams and software engineering teams.

Key Contributions

- Business requirements and product feature analysis for enterprise fintech solutions.
- SQL-based fraud detection and compliance rule development.
- AI model testing and product validation.
- Product development coordination and technical stakeholder management.
- Enterprise SaaS implementation and customer adoption.

Product Operations & Project Coordinator **March 2024 - February 2025**

Gözen Digital Aviation | Istanbul, Türkiye

Aviation Technologies, SaaS Product Operations & Digital Transformation

- Coordinated customer-facing product operations for the Simorg and Operator aviation technology platforms.
- Managed relationships with international customers across the Americas, Asia and Africa within a 10-person cross-functional team.
- Analyzed business requirements, customer feedback and operational challenges to identify product and process improvement opportunities.
- Collaborated with technical and operational stakeholders to translate customer needs into structured improvement requests.
- Supported project coordination, task prioritization and Agile workflow improvement activities.
- Redesigned Jira workflows and reporting structures to improve task visibility, communication and operational efficiency.
- Developed data visualization and reporting improvements to support decision-making and performance monitoring.
- Established structured diagnostic frameworks to accelerate incident analysis, ticket classification and issue resolution.
- Conducted customer churn analysis and supported retention strategies through data-driven insights.
- Improved customer onboarding processes and operational tracking to increase product adoption.
- Supported continuous improvement initiatives across product operations, customer experience and internal workflows.

Key Achievements

- Increased customer retention by 40%.
- Reduced customer churn by 20%.
- Contributed to 75% customer base growth within six months.
- Reduced meeting durations by 50% through improved Jira workflows and reporting.

- Reduced ticket triage and resolution time by 50% through structured diagnostic processes.

Key Contributions

Product Operations | Project Coordination | Agile Workflows | Customer Analytics | Process Optimization | SaaS Product Improvement | International Stakeholder Management

IT Business Analyst – Digital Transformation **August 2022 - July 2023**

361 Digital Transform Agency | Izmir, Türkiye

Enterprise Software, Warehouse Management Systems & Manufacturing Technologies

- Conducted business requirements analysis for enterprise software and SQL-based warehouse management solutions.
- Gathered and documented business requirements from operational stakeholders and translated them into development tasks.
- Analyzed warehouse management, inventory and manufacturing processes to identify improvement opportunities.
- Collaborated with software developers, designers and business stakeholders to align system functionality with operational requirements.
- Supported business process mapping, requirements clarification and technical solution discussions.
- Participated in SQL-based system improvements and database usability optimization initiatives.
- Contributed to international warehouse and production management module improvements.
- Supported development task prioritization and coordination between business and technical teams.
- Designed and developed a 24/7 self-service Q&A knowledge platform to improve operational information accessibility.
- Supported digital transformation initiatives focused on improving business process efficiency and user experience.

Key Contributions

Business Analysis | Requirements Engineering | Digital Transformation | Warehouse Management Systems | SQL | Process Improvement | Enterprise Software

Frontend Developer – Web Applications **May 2022 - August 2022**

otelfiyat.com | Türkiye

Travel Technologies & Web Application Development

- Developed frontend features for an online travel pricing platform using React, JavaScript, Node.js, HTML and CSS.
- Implemented responsive web interfaces to improve usability across desktop and mobile devices.
- Supported user-facing application development and feature implementation.
- Worked on interface functionality and software development tasks.
- Gained hands-on experience in web technologies, application development workflows and technical problem-solving.

Customer Operations Specialist – E-Commerce (Customer Service Representative) **November 2020 - October 2021**

Concentrix / Webhelp – Trendyol Project | Izmir, Türkiye

E-Commerce, B2B Operations & Supplier Relations

- Managed communication with e-commerce sellers and business partners.
- Supported operational issue resolution and customer service processes.
- Strengthened B2B supplier relationships through structured communication and problem-solving.
- Contributed to customer engagement initiatives and operational service quality improvements.
- Developed stakeholder communication, business needs understanding and customer-focused analytical skills.

INTERNSHIPS

Intern **2018**

W Digital | Istanbul, Türkiye

Digital Platforms, Marketing Technologies & Content Management

- Supported digital marketing operations and digital platform management activities.
- Assisted with content planning, preparation and coordination for digital channels.
- Participated in digital campaign processes and online communication activities.
- Supported the organization and monitoring of digital workflows.

Intern **2018**

Narlıdere Municipality | Izmir, Türkiye

Digital Content, Institutional Communication & Public Sector Operations

- Supported content preparation and editorial activities for institutional communications.
- Assisted with organizing and reviewing written and digital communication materials.
- Contributed to documentation and information management processes.

- Supported coordination of communication-related operational tasks.

SELECTED AI & SOFTWARE PROJECTS

AI Portfolio Manager **Personal Project**

LLM-Based Investment Analysis Application

- Developed a React-based investment analysis application using an LLM-driven recommendation approach.
- Designed functionality to analyze investor profiles and generate AI-assisted investment insights.
- Implemented application workflows supporting daily buy, sell and hold recommendations.
- Combined frontend development, user experience design and AI-enabled decision-support concepts.
- Applied product-oriented development principles to structure application features and user interactions.

Technologies & Concepts: React | LLM-Based Recommendations | AI-Assisted Financial Analysis | Investor Profiling | Web Application Development

DoseKey **Personal Project**

Web-Based Tracking Application

- Developed and deployed a web-based tracking application using AI-assisted development methods.
- Designed user workflows and application functionality for structured tracking and information management.
- Implemented automated end-to-end testing using Playwright.
- Configured GitHub Actions to support automated test execution.
- Tested application behavior across Android Chrome and desktop Chrome.
- Applied software testing and continuous integration practices to improve application reliability.

Technologies & Concepts: AI-Assisted Development | Web Applications | Playwright | GitHub Actions | End-to-End Testing | Continuous Integration

EDUCATION

Bachelor's Degree – Management Information Systems **September 2025 - Present**

Anadolu University

Bachelor's Degree – Political Science and Public Administration (French) **2014 - 2021**

Marmara University

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Become a Product Manager: Learn the Skills & Get the Job – Udemy | December 2024
- Business Analysis Academy
- Six Sigma Foundations
- Data Analysis Program – Veri Analizi Okulu | 2025
- The Complete SQL Bootcamp | 2022
- McKinsey Forward Program – McKinsey & Company
- Frontend Web Development – Patika.dev
- Learning Node.js

LANGUAGES

- Turkish (Native)
- English (Professional Working Proficiency)
- French (Professional Working Proficiency)
